△ Projects

Life-cycle of Toxoplasma gondii and co-transcriptomic analysis of host infection

2018-now

> Produced the first single-cell atlas of Toxoplasma. Built an interactive visualization website with Apache2, Flask, Bokeh.

A novel single-cell analysis algorithm: self-assembling manifolds (SAM)

2017-2019

> Single-cell sequencing reveals novel germ cell population in a parasitic flatworm, Schistosoma mansoni.

Temperature effect on DNA polymerase fidelity

2015-2018

> Characterized error rate of DNA polymerase adapted to a wide range of temperature. Found their polymerase fidelity is differentially sensitive to changes in reaction temperature. Manuscript currently in preparation.
